

Carbon Black • TX391

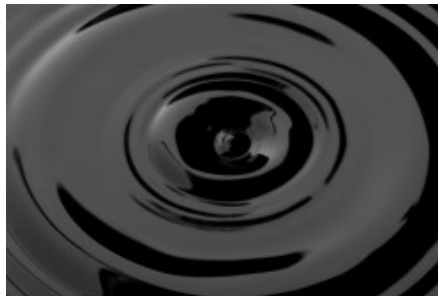

TX391 is a high tint, low structure N300 series specialty black developed for liquid dispersions and specialty rubber applications. The high tinting strength of TX391 makes it ideally suited for aqueous dispersion mixtures. TX391 also offers high tensile strength and improved abrasion resistance suitable for tire and industrial products.

PRODUCT FORM

- Pellet

TYPICAL APPLICATIONS

- Roofing materials
- Industrial tires
- Bead compound
- Coloring and tinting of:
 - Inks
 - Plastics
 - Paints
 - Mulch
 - Construction material

PERFORMANCE FEATURES

- High tinting strength
- High tensile
- Good wire adhesion
- Improved abrasion resistance

Test Procedure	Typical Properties	Test Method
OAN, cm ³ /100g	71	ASTM D-2414
Tint, %	124	ASTM D-3265
Surface Area, m ² /g	87	ASTM D-6556
